

UPCOMING BUILDING RENOVATION PROJECT

Starting in November, your LPL will be undergoing a renovation project, the first since we moved to our current location in June of 2004. We will be **replacing flooring, repainting, and refurbishing restrooms** in a series of four phases covering different parts of the building.

Please know we will continue to serve you to the best of our ability throughout the project. However, from October through the project's planned completion in mid-February, you will notice changes as we prepare for and accommodate these improvements. These changes will affect services; access to spaces, materials, and technology; and the scheduling of classes and events.

We are excited about our facelift but also realize the stress it will cause, and we ask for your patience during this time. **Starting Monday, November 2nd**, we advise that you contact us before visiting the Library to make sure the services or materials you need are available, as these will vary throughout the phases.
